

## TEGO® PRODUCT SERIES

Freely express yourself with TEGO® product series, mix varying TEGO® product series to create your own unique look, whether it is one TEGO® product series, or combine several series.

TEGO® product series comes in nine unique variation types:

Box, Tapered Left, Tapered Right, Valley, Valley Offset left, Valley Offset right, Ridge, Ridge Offset right, and Ridge Offset left.

Meticulously metal formed in mill finish aluminium using SOLIDAL® IMM intelligent manufacturing and smartweld technology, ensures the highest build quality before a lick of paint is applied. The final coating has a minimum thickness of 45um up to 130um paint thickness depending on selected finish. Coated with world leading paints, making the finished application ideal for high corrosive environments with up to 30year Warranties.

## TEGO® MODULE SIZES

Each TEGO® product series is supplied in optional depths and widths:

**Depth:** 20mm/60mm/90mm/120mm

**Width:** 600mm / 900mm / 1200mm

**Length:** up to 4000mm

## TEGO® COLOURS & FINISHES

All TEGO® products are available in an unlimited number of colours and finishes with no minimum order requirements.

Colour matching: Provide a physical sample or your RAL or Pantone colours for colour

### SOLIDAL® PPG WET SPRAY PVDF

Fluorine Carbon coating is a high-grade spray coating with excellent performance of anti-fading, high air pollution resistance, strong crack resistance, UV resistance, ability to withstand harsh weather conditions and has unlimited colour range.

### INTERPON AKZONOBEL® POWDER COAT

Powder coating is a dry finishing process applied as a free-flowing, dry powder: hard finish, that is tougher than conventional paint, easy to clean, able to withstand harsh weather conditions, UV resistant, and available in standard and custom colours in a wide range of metallic and matt surfaces.

## COMPLIANCE

All TEGO® products are non-combustible under NCC2019C1.9. with NATA AS1530.1 & AS1530.3 certifications.

## APPLICATION METHODS

Stick Fit Application (Subframe)

Curtain Wall Application

## **INSTALLATION**

Fast and Simple to install. All TEGO® product series are delivered prefabricated, pre-coated, QR labelled readto be installed.

Screw fixed through the perimeter of the TEGO® folded flange into the subframe.

## **SUSTAINABILITY**

All TEGO® series are manufactured using 100% aluminium and mechanical systems (mechanically fixed stiffeners). TEGO® is fully recyclable (no glues and tapes used), cradle to cradle product.
